Dear Recruiter,

I am thrilled to apply for the QA Role With over five years of experience as a Senior QA Engineer, I offer a robust blend of automation and manual testing expertise, with a focus on delivering high-quality software across web, mobile, and banking applications. My proficiency in crafting test cases, integrating automation with Git workflows, and collaborating with R&D teams to adopt cutting-edge technologies aligns seamlessly with the Company's commitment to innovation and excellence.

At Innovature Infopark, I have excelled in developing and automating comprehensive test cases using tools like Selenium, Java, Playwright, and TypeScript within Cucumber BDD frameworks. I configured automation tests with Git workflows, streamlining CI/CD pipelines and enhancing testing efficiency. My work on a Healthcare Management Platform involved automating UI and API test cases, while my contributions to a Marine Booking System included load and security testing to meet OWASP standards. For a Digital Ad Management project, I improved test case coverage by 40% through a robust automated framework. Additionally, I have extensive experience testing mobile applications on iOS and Android, ensuring seamless functionality, and have worked on banking applications, focusing on regulatory compliance and secure transactions. Collaborating with R&D teams, I integrated new technologies to enhance product quality, consistently delivering defect-free releases within Agile frameworks.

My technical skill set includes Selenium WebDriver, Postman, Apache JMeter, OWASP ZAP, Burp Suite, and Git, with a strong aptitude for creating and executing detailed test cases across functional, regression, and performance testing. I have mentored junior team members, fostering a culture of continuous learning, and worked closely with cross-functional teams to meet tight deadlines. My Bachelor's degree in Electronics and Communication Engineering from Anna University further strengthens my technical foundation.

I am eager to contribute my QA expertise to drive your success. My ability to deliver secure, high-performance software for web, mobile, and banking applications, combined with my experience in Git workflows and R&D collaboration, positions me to add significant value to your team.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and experiences align with your needs. I am available for an interview at your convenience and look forward to the possibility of contributing to your innovative projects.

Sincerely,
Jithin Somaraj
